SUMMARY

Product Designer and Builder with 4+ years of experience shipping digital products across logistics, proptech, fintech, and brand design. Currently leading product and brand design at Moovable — Africa's Logistics Operating System — while independently building CRIB, a proptech platform enabling Nigerian renters to pay rent in flexible installments. Known for translating complex problems into products that feel inevitable. I go by Buildwith_Pr3cioux because I do more than design — I ship.

EXPERIENCE

Lead Product Designer

Moovable — Full-time · Lagos, Nigeria

January 2026 — Present

- Leading product and brand design across Africa's Logistics Operating System.
- Designing the full product suite — web platform, rider app, operator dashboard, and brand identity system.
- Collaborating closely with engineering and product teams to ship fast and with precision.
- Establishing and maintaining the design system used across all Moovable products.

Founder & Product Designer

CRIB — Side Project · Lagos, Nigeria

2022 — Present

- Building a proptech platform enabling Nigerian renters to pay rent in flexible installments.
- Designed and developed the full product — including a proprietary CRIB Score creditworthiness system.
- Managing product strategy, design, and frontend implementation end to end.

Operations & Product Support

Showmax · Multichoice Nigeria — Full-time · Lagos, Nigeria

2022 — January 2026

- Selected as an original team member for the Showmax 2.0 launch, contributing to core operational setup and execution.
- Handled complex product issues and escalations, working closely with technical and product teams.
- Created and implemented internal systems and workflows that improved efficiency and accuracy.
- Acted as a bridge between frontline agents, supervisors, and product teams during rollout phases.

UX Designer

Veneri — Freelance (Remote)

June 2025 — November 2025

- Designed and launched the Veneri website, focusing on intuitive event booking experience.
- Developed web and mobile booking sections, ensuring consistency across platforms.
- Collaborating on the conversion of the website into a mobile app.

UX Designer

SolveX — Freelance (Remote)

June 2024

- Led end-to-end design of Apprue, a web and mobile appraisal platform with 40+ responsive screens.
- Conducted user research and workflow analysis to improve usability and organizational efficiency.
- Contributed to Umuada — a female empowerment app — and other in-house initiatives.
